

Home Owners Spray Foam Process: Under floors

To take some control over your install, costs and avoid awkward question, guess work and your own peace of mind, the following table will be helpful in your decision making in terms of the physical process and cost, to enable your home to be more energy efficient.

Costs are determined by:

- 1. Volumes of Product required for your job and
- 2. Labour time (Degree of Ease to difficulty) considered. (Clearance) Access. The tighter, the harder/longer.
- Mobilization costs
 Distance and travel will determine the final charge rate.

To estimate the square meters involved:

- 1. Step out/ measure in meters the Length x Width and multiply.
 - E.G 10m long x 8 m wide = 80m2.
 - If home is L shaped, refer as 2 square boxes and combinetotal.
 - Deduction of laundry and possibly bathroom dimensions can be made to save
 - a few dollars. Note: In extreme cold areas, advisable bath/toilets still be done.
- 2. The under floor install requires the installers to lie on their backs to enable spray to floor surface and joists with minimum requirement of 50cm.
 - Areas less than 50cm can sometimes still be accessed via digging trench or similar though extra time and effort required varies.

Costs:	Examples:	50cm to 80cm	80cm Plus
	70to 100m2	@ \$ 24m2	@ \$ 22m2
	100 to 150m2/	@ \$ 22m2	@ \$ 20m2
	150 to 200m/2	@ \$ 20m2	@ \$ 18m2
	200 to 250m2	@ \$ 18m2	@ \$ 17m2
	250 to 300m2	@ \$ 17m2	@ \$ 16m2

Most homes fit in at \$ 20.00m2 + GST

Example: $90m2 @ $24m2 = $2160 \times 10\% GST = $2376.00 Inclusive.$ $90m2 @ $22m2 = $1980 \times 10\% GST = $2178.00 Inclusive.$

Please Note:

Guide prices displayed attract substantial reductions when incorporated with cavity wall injected insulation.

All dimensions shall be re-checked prior to install on day to ensure neither parties are disadvantaged
